DOWN TO THE WIRE

BOSTONtec specializes in consistently customizing and modifying solutions to meet the needs of our customers. This means proactively designing product enhancements or developing entirely new solutions. Whatever the need - down to the wire.

CHALLENGE

Cords in the way? Assembly, fulfillment, healthcare and laboratory facilities use a variety of equipment - and deal with the plethora of cords that come with it. You need workstations that:

- Eliminate the clutter effectively
- Ensure the safety of employees
- Are compatible with the complexity of your equipment

RESULT

A wire management panel! BOSTONtec has designed a new, practical solution to contain cords. Our wire management panel lies flush with the work surface, keeping wires out of the way and out of sight - all within one trough. This helps your workers maintain a safe distance from the cords, simplifies use and provides a finished look. The panel even has enough room to store a power bar.

This practical solution is available immediately, and it can be used with workstations using both single and double uprights.
