

## Customer Testimonial

**“A wonderful company to do business with and to work for!”**

**-- Claire Warren, Aptar Closures**

Hello, my name is Claire Warren.

I am employed at Aptar, a local business. Part of our operation involves using electrical adjustable height workstations in order to provide an ergonomic working environment for our operators.

We use electrical adjustable workstation. The problem has been broken workstations that have lost their workability with replacement parts being unavailable.

Our maintenance department decided to research replacement workstations. I spoke with the manager and told him that we have a great company right in our back yard. I am a former employee of Case Systems/BOSTONtec. I know firsthand of their integrity.

*Case Systems/BOSTONtec's dedication to exemplar customer service speaks for itself. When I reached out to them, I was greeted with enthusiasm and commitment to provide exactly what our needs are in terms of electric height adjustable workstations.*

After meeting with the sales and engineering departments and explaining that our workstations would be a custom build, they went to work immediately to begin the design.

They have stayed in constant communication with me to find the best solution to meet our needs.

I am excited to announce that we had our first workstation delivered to us in December. The workstation is incredible! It has everything we asked for, superior quality, great functions on all levels with wonderful useable accessories.

We are in the process of having three more built.

A great neighbor and a wonderful company to do business with and to work for. Thank You Case Systems/BOSTONtec!
