

## Customer Testimonial

**“We had an excellent experience with BOSTONtec and their team.”**

**-- Kari Roberts, Dolcezza Interior Design & Pottery**

We had an excellent experience with BOSTONtec and their team. When designing my client's custom ceramic/art studio, flow, space utilization, organization, and durability were key considerations. .

*The Electric Height Adjustable Workbench was implemented in the design due to its versatility, functionality, and mobility.*

It houses all the accessories and tools, overhead lighting, and a large work surface needed for daily operations. It also creates an environment to easily transport items to the paint area.

A manual height adjustable table was used for a table slab roller and can be adjusted with a few easy steps.

*When paired with Case Systems casework, we were able to create the ultimate creative workspace that helps them seamlessly and effectively use their space in an everyday function.*
