At BOSTONtec® we believe it’s important to have a workstation that fits your needs. That’s why we are excited to provide our new Online Configurator tool!

Now you can choose and click your way to your ultimate workstation design! Don’t see exactly what you are looking for? No problem! We’re pros at customization. We design our workstations to adjust to you, rather than the other way around.

That’s important, because a well-designed workplace can make people up to 25% more productive and reduce health care costs. It’s also easier to retain talent in a healthy, comfortable environment.

Ready to experience the quality, ease, and durability? Let’s talk. bostontec.com
BOSTONtec was founded on a commitment to providing ergonomic workstations that improve the quality of life and increase productivity. This is achieved through a full line of height adjustable workstations and a wide range of accessories that lift, tilt, rotate and slide for optimal flexibility.

**PRODUCTIVITY**
While automation has improved quality and productivity, many of the tasks that remain are repetitive and can be detrimental to the human body. Proper workstation solutions allow users to focus strength and energy on the tasks at hand while avoiding harmful effects.

Properly designed workstations can increase productivity up to 25% over traditional fixed workstations by reducing unnecessary motion and subsequently increasing ROI.

**MSDs**
Musculoskeletal disorders (MSDs) are injuries and disorders of soft tissues such as muscles, tendons, ligaments, joints and the nervous system caused by repetitive motions. MSDs frequently involve the arms, wrists, hands and back.

MSDs account for 34% of all lost workday injuries and illnesses.

Each year employers report nearly 600,000 MSDs requiring time away from work. BOSTONtec ergonomic workstations and accessories assist in preventing strain with convenient workstation height adjustability and by placing tools and other items within reach of the operator.

BOSTONtec follows ANSI/HFS 100-1988 guidelines to ensure proper clearance and adjustability for seated operators. Our workstations are designed to support ADA compliance.

Workforce diversity has made designing for the “average” worker obsolete. BOSTONtec workstations are designed for 5th to 95th percentile users.

For more information go to www.bostontec.com/ergonomics

Comfort and productivity can be significantly improved if the ergonomic reach of the operator is considered when designing a workstation. BOSTONtec has a wide variety of accessories to help place needed items according to the recommended zone.

---

**Horizontal Reach Zones**

1st Zone
- High use items
- Least stress, most comfort
- Easiest access to items with minimal movement required

2nd Zone
- Medium use items
- Operator can comfortably reach by extending arm and rotating shoulder
- Requires little time to access items but extensive time in this position can cause fatigue and skeletal stress

3rd Zone
- Low use items
- Involves operator trunk movement representing significant efficiency reduction

4th Zone
- Storage only
- Located outside of all three reach zones

**Vertical Seated Reach Zones**

1st Zone
- High use items
- Offers most operator comfort and fastest access to items

2nd Zone
- Medium use items
- Requires little time to access items but extensive time in this position can cause fatigue and skeletal stress

3rd Zone
- Low use items and storage
- Involves operator trunk movement representing significant efficiency reduction

---

Ergonomics At Work

**Let BOSTONtec Get You In The Green Zone**
Design & Engineering
Working with the customer, our sales and engineering team identify and address the specific needs of the application. Our engineering team then creates a customized solution with renderings to assist in completion of the final design.

Manufacturing
Once designs are customer-approved, our engineering and production teams turn the drawings into customized workstations. All aspects of manufacturing are performed in-house.

- Sheets of steel are laser cut, pressed and formed to exact specifications.
- Our welding department utilizes MIG, TIG and spot welding techniques.
- All steel components are finished on our powder coating line where they are high pressure washed, degreased, painted and baked at 400°.
- Finally, workstations head to assembly where frame and under work surface components are assembled pre-shipment.

Shipping
BOSTONtec workstations are carefully packaged and palletized for protection during shipment.

Additional Services
BOSTONtec also offers project management services and on-site installation.

BOSTONtec is the industry leader in customized solutions.
Our in-house capabilities take your ideas from concept to final product.

Build Your Own Workstation in 4 Simple Steps!

1. Select Workstation Base Frame
2. Select Feet or Casters Type
3. Select Work Surface Type
4. Select Accessories

**Typical Fulfillment Workstation**
- Corrugate Shelf Divider: CSSDIV
- Double Bay Uprights: DBUP53
- Steel Panel Shelf Divider: DNV1215
- 12" Steel Shelf: SH1220
- Corrugate Storage Shelf: CSS1560
- 8-Outlet Power Bar: PBHM08
- Stackable 6" Drawers: DRW36
- Laminate Work Surface: 3M3060
- Pneumatic Adjustable Monitor Arm: PFSMA
- CPU Holder: CPU02
- Leveler Feet: FA30G
- Bin Rail: BR0429 (Bins not included)
- Cantilevered Base Frame: PB3060

**Typical Assembly Workstation**
- Steel Peg Board: BS2428P
- Double Bay Uprights: DBUP53
- 15" Steel Shelf: SH1530
- LED Overhead Light: LED245660
- Steel Panel Shelf Divider: DNV1215
- Bin Rail: BR0429 (Bins not included)
- Maple Work Surface: MS3060
- Cantilevered Base Frame: PBH3060
- Stackable 6" Drawers: DRW36
- Heavy-Duty Casters: FD30I
- 12" Steel Shelf: SH1220
**Cantilevered Workstation**

Best for multiple-operator, multiple-shift applications. Designed to support 5th to 95th percentile operators in a sitting or standing posture. Work surface height is easily adjustable at the touch of a button. A rear fixing frame provides stable support for single, double or triple bay uprights to hold bin rails, shelving, lighting and other accessories.

**FEATURES:**
- Cantilevered style leg ensures ample leg room
- Adjusts 28” to 44” without work surface
- Programmable switch provides digital height read-out and preset adjustability
- Medium Duty (PB) includes self-contained linear actuator with integral limit switches, 12 VDC low voltage control
- Heavy Duty (PBH) includes dual-synchronized linear actuators with integral limit switches, 12 VDC low voltage control
- Supports ADA compliance
- Gray epoxy powder coat finish (Additional colors available)
- Feet or casters, work surface and accessories ordered separately
- See page 49 for QuickShip availability

**BUILD YOUR PART NUMBER**

PB3060

**Center-Justified Workstation**

Created for applications requiring access from both sides of the table. Best for multiple-operator and multiple-shift applications. Designed to support 5th to 95th percentile operators in either a sitting or standing posture. Work surface height is easily adjustable at the touch of a button. This frame does not support uprights.

**FEATURES:**
- Center-justified style leg
- Adjusts 28” to 44” without work surface
- Programmable switch provides digital height read-out and preset adjustability
- Medium Duty (PBC) includes self-contained linear actuator with integral limit switches, 12 VDC low voltage control
- Heavy Duty (PBHC) includes dual-synchronized linear actuators with integral limit switches, 12 VDC low voltage control
- Supports ADA compliance
- Gray epoxy powder coat finish (Additional colors available)
- Feet or casters, work surface and accessories ordered separately
- See page 49 for QuickShip availability

*Based on evenly distributed loads
**Cantilevered Workstation**

Best for single-shift, single-operator applications where frequent height changes are not required. Designed to support 5th to 95th percentile operators in either a sitting or standing posture. Height adjustments are made by removing the locking hand screws, repositioning the telescoping legs to the desired height and replacing the locking hand screw. Rear fixing frame provides stable support for single, double or triple bay uprights to hold bin rails, shelving, lighting and other accessories.

**FEATURES:**
- Cantilevered style leg ensures ample leg room
- Medium Duty (AF) adjusts 28” to 40” without work surface
- Heavy Duty (AFH) adjusts 28” to 44” without work surface
- Supports ADA compliance
- Gray epoxy powder coat finish (Additional colors available)
- Feet or casters, work surface and accessories ordered separately
- See page 49 for QuickShip availability

**BOSTONtec**

**CONTACT US | 989-496-9510**
**Technical Workstation**

This sturdy, four-post workstation is available in a fixed height or with optional leg extensions. The leg extensions are inserted inside the workstation legs and secured with machine screws. For increased mobility, optional swivel casters are available.

**FEATURES:**
- Ships knocked down (KD)
- Gray epoxy powder coat finish (Additional colors available)
- Work surface and accessories ordered separately

**BUILD YOUR PART NUMBER**

- **Prefix**: TCBL, TCBE, TCBC
- **Height**: 30” | 36”
- **Depth**: 24” | 30” | 36”
- **Width**: 30” | 36” | 48” | 60” | 72” | 84” | 96”

*Based on evenly distributed loads*

**Technical Workstation with Leveler Glides (TCBL)**
- Fixed height
- Includes leveler glides

**Technical Workstation with Leg Extensions and Leveler Glides (TCBE)**
- 8” of height adjustment
- Includes leg extensions and leveler glides

**Technical Workstation with Casters (TCBC)**
- Fixed height
- Includes 2-locking and 2-non-locking casters
- 3” polyurethane casters

**Under Work Surface Shelving**
- Provides additional storage for occasional use items
- Available in half or full depth
- Choice of Phenolic Resin, Epoxy or Laminate surface

**Standing Workstation Frame**

Cost-effective means of supporting a small work surface and accessories. Ideal in spaces where a full workstation is not needed. Frames may be used behind conveyors to provide easy access and support for tools or task items. Adding optional casters creates a mobile desk.

**STANDING WORKSTATION FRAME FEATURES:**
- Single bay frame 30” w x 69” h
- Double bay frame 60” w x 69” h
- Both frames accept 24” x 30” w or 24” d x 36”w work surfaces
- Work surface and accessories adjust in one-inch increments
- Includes leveler feet, top and bottom support bars
- Gray epoxy powder coat finish (Additional colors available)
- Casters, work surface and accessories ordered separately

**Trolley**

Offers additional mobile storage for shared materials or to refill work areas. The trolley uses two uprights to provide easy, open access to items.

**TROLLEY FEATURES:**
- Accepts most industrial accessories and articulating arms
- Accessories adjust in one-inch increments
- Gray epoxy powder coat finish (Additional colors available)
- Includes 2-locking and 2-non-locking 4” casters and top and bottom cross bars
- Accessories ordered separately

**BUILD YOUR PART NUMBER**

Wire Harness Board Frame

This workstation is the result of three years of cooperative development with several major wire harness fabricators. The electric height adjustable and manual tilt mechanisms provide a more ergonomic work environment increasing productivity. Frame allows operator to properly set a large wire harness board quickly, then change position without removing work in process.

Frame may be raised or lowered at the touch of a button so operator can work comfortably sitting or standing.

Deck adjusts easily from horizontal to vertical position as well as multiple tilting options. Horizontal setting provides operator access to the board from all sides.

Load Capacity 350 lbs*

FEATURES:

• Space-saving compact footprint, 36” d x 72” w
• Deck is 36” d x 72” w; expands to 48” d x 72” w
• Supports boards up to 48” d x 96” w
• Multiple frames can work together to support extra long boards
• 36” to 70” horizontal position height range
• 11” to 46” vertical position height range
• Manual tilt 0° to 90° in 10-degree stops
• Programmable switch provides digital height read-out and preset adjustability
• Self-contained linear actuator with integral limit switch, 12 VDC low voltage control
• Gray epoxy powder coat finish (Additional colors available)

Leveled Feet

• Allow user to level workstation on uneven surfaces
• Leveler glides included

Drop Down Feet

• Unique drop down foot design
• Add casters without increasing starting height of the workstation
• Included with all casters

Lag Plates

• Compatible with leveler feet
• Plate has four 3/8” holes to bolt to floor (bolts not included)

Medium Duty ESD Casters

• Available with 2 locking and 2 non-locking casters or all 4 locking
• Polyolefin core with conductive rubber tread
• 5” overall height; 4” wheel
• Non-marking

Medium Duty Standard Casters

• Available with 2 locking and 2 non-locking casters or all 4 locking
• Polyurethane material
• 5” overall height; 4” wheel
• Non-Marking

Universal Leveling Casters

• Nylon wheel; rubber leveling pad
• 4” overall height on caster;
• 4 1/2” overall height on leveler
• 2 1/2” wheel
• Non-Marking

Heavy Duty Standard Casters

• Available with 2 locking and 2 non-locking casters or all 4 locking
• Phenolic material
• 5” overall height; 4” wheel
• Non-marking
INDUSTRIAL WORK SURFACES

**Premium Grade Plastic Laminate**
This highly durable work surface is constructed of 1 1/2" high density core board laminated with a layer of high pressure plastic laminate.

**Standard Laminate**
Our most popular and economic work surface. All four sides are edged with a high impact-resistant 3mm thick PVC edging in a complementary color. Finished with a 2mm radius. See page 49 for QuickShip availability.

**Post Formed (Rolled Front)**
Our most ergonomic option for operators resting their wrists or arms on front edge. The front is formed in a 90-degree rolled edge for maximum user comfort. The back and two sides are straight 3mm edged. It has black phenolic resin underside. Also available in a 180-degree rolled edge.

**Electrostatic Discharge (ESD) Version**
All surfaces above are also available in an Electrostatic Discharge (ESD) version utilizing a special laminate that reduces electric current transfer on the work surface. Flush ESD grounding bolt is included and swivet connectors are available for grounding.

**Stainless Steel**
Durable and chemical-resistant, 1 1/2" stainless steel work surfaces are constructed of 14 gauge stainless steel formed over laminated core board. Work surface comes with a random brushed finish and is non-reflecting.

**Maple**
Ideal for areas that must stand repeated wear and tear. Beautifully fabricated with 1 1/2" edge laminated hardwood maple. This surface provides maximum strength and durability and looks good doing it. Also available in a 180-degree rolled edge.

**Phenolic Resin**
Solid phenolic is a high-pressure, thermoset resin composite. This chemical-resistant material is nonporous and non-conductive with high impact resistance and superior structure strength.

CONTACT US | 989-496-9510
Transfer & Rotation

Surface rollers and ball transfers are designed to simplify the moving of heavy loads.

Ball transfers are available in fixed or pneumatic retractable options. Each ball transfer is a self-contained unit capable of handling 10 to 30 pounds and allows the operator to move loads in multiple directions easily. When assembled in an appropriate pattern, they can support loads in excess of 1,000 pounds. Pneumatic ball transfers retract .065” below flange and may be controlled by either foot or hand switch.

A variety of surface roller and ball transfer patterns are available to accommodate differing tasks. Consult your sales representative for assistance in configuring the proper pattern for your application.

Compatible with all industrial workstations.

Tilting Work Surfaces

Tilt tables improve user ergonomics and productivity by better positioning a task, reducing operator reach and promoting proper posture. Available with a full or split surface tilt in drafting or rotational style. Choice of manual or electric adjustability. Available in laminate and hardwood work surfaces.

Drafting Style Tilt

Used for applications in which the work surface pivots from its front edge, similar to a drafting table.

Rotational Tilt

Used for applications where the surface tilts around an axis placed back from the front edge of the surface. Unlike a standard drafting table tilt, the front of the surface will drop as the back rises. This method helps users gain easier access inside large, deep items.

Manual Tilt

Manual tilt surfaces provide a simple, cost-effective method for adjusting position of smaller surfaces for light duty applications. The manual tilt option provides a ratcheting latch in the back of the work surface that allows the surface to be lifted to the desired tilt up to 30 degrees where the latch will lock into position.

Electric Tilt

Standard electric tilt up to 60 degrees is available on any style tilting work surface.
Additional Specialty Surfaces
BOSTONtec offers customized work surface solutions to meet specific applications. Consult your sales representative for assistance.

Work Surface Cutouts
Surface cutouts can be designed to incorporate drop-in scales, turntables, wiring grommets or other special uses.

All our surfaces can be modified to meet almost any requirement - laminate, stainless steel, hardwood maple, phenolic resin.

Bi-Level Mechanics
Compatible with cantilevered base frames, bi-level mechanics create an adjustable split-level work surface for your keyboard, mouse or workspace.

Adjustable with one hand, the surface can move from 7” above work surface to 8” below work surface and has an angle range from 15-degree negative tilt to 15-degree positive tilt.

**Pull-Out Keyboard Tray**

**CAPACITY:** 40 lbs.
- Allows operator access to keyboard as needed then stores under work surface when not in use.
- Mounts under all laminate and hardwood work surfaces at least 30" deep.
- Tray size 18" d x 21" w
- ½" extension ball bearing slides allow tray to extend 13".
- 2 ¾” height clearance for keyboard.

**Articulating Platform Arm**

**CAPACITY:** 40 lbs.
- Provides easy, quick access to items then swings out of way when not in use.
- Accepts keyboard tray KT1907.
- Rotates 360 degrees.
- Extension adjustability range = 22" (to platform center).

**Keyboard Tray & Mouse Pad**

**CAPACITY:** 6 lbs.
- Keyboard Tray
  - Attaches to platform holder PH1313 or PH1322 to support a standard keyboard at a 15-degree tilt.
- Mouse Pad
  - Mounts on side of PH1313 or PH1322.

**CPU Holder**

**CAPACITY:** 50 lbs.
- Secures CPU off of floor.
- Wrap around design provides easy access when needed.
- Mounts under all laminate and hardwood work surfaces at least 30" deep.
- Adjusts to fit CPUs 2 ⅞" x 11 ⅛" w x 14 ⅞" h.
- 16" sliding track with 360 degree swivel.
- Color: Black.
- Contact BOSTONtec for additional CPU options.

**CPU Holder - Thin Client**

**CAPACITY:** ≤ 10 lbs. (Upright mounted).
- Wrap around design provides easy access when needed.
- Mounts on standard uprights.
- Standard VESA mounting pattern (75 x 75 mm and 100 x 100 mm sizes).
- Upright mounting brackets included.
- Security strap included.
- Screws to mount to monitor included.
- Adjusts to fit CPUs 1 ⅛" x 2 ⅝" d x 4" - 8" h.
- Color: Black.
- See BOSTONtec monitor arms for more information.

- **CPUTC:** CPU Holder Thin Client
  - **WEIGHT:** 3 lbs.
**8-Outlet Horizontal Power Bar**
- Keeps power within reach for easy end of day shut down of tools and lights
- Mounts on standard uprights at any convenient horizontal position, front or back
- Extruded aluminum housing
- 8 AC power outlets (115 VAC 15A)
- Circuit breaker and lighted switch
- UL and CSA listed and approved
- Length of power cord: 8 feet

**Horizontal Power Bar Work Surface Mount**
- Mounts power bar to work surface for easy access, no uprights required
- Mounts above or below work surface

**6-Outlet Power Bars**
- Keeps power within reach for easy end of day shut down of tools and lights
- Extruded aluminum housing
- 6 AC power outlets (115 VAC 15A)
- Circuit breaker and lighted switch
- UL and CSA listed and approved
- Length of power cord: 15 feet
- Vertical power bar mounts to underside of work surface
- Horizontal power bar mounts on standard uprights

**Wire Management Trough**
- CAPACITY: 10 lbs.
- Keeps electrical wires off surface providing additional work space
- Hides wires for neater workspace appearance
- Optional forward or backward facing mount
- Mount below work surface and behind workstation to further conceal wires
- 10’ x 30” w

LABORATORY

Build Your Own Workstation in 4 Simple Steps!

1. Select Workstation Base Frame
2. Select Feet or Casters Type
3. Select Work Surface Type
4. Select Accessories

Laboratory workstations are compatible with accessories within the laboratory section only.

Typical Laboratory Workstation

- Metal Shelf: SU011260MDAS
- Steel Slotted Uprights: URS13660
- Heavy Duty Standard Casters: FD30N
- Manual Height Adjustable Workstation: LMC3060
- Power Manifold: PM01UR51G06015
- Pneumatic Adjustable Monitor Arm: PFSMAS
- Under Work Surface Keyboard Tray and Mouse Pad: UWKTM

BOSTONtec®
**LABORATORY HEIGHT ADJUSTABLE WORKSTATIONS**

**Electric Height Adjustable Laboratory Workstation**

This workstation is ideal for multiple users and maximum configurability in a fast-paced lab environment. Work surface height is easily adjustable at the touch of a button.

**Manual Height Adjustable Laboratory Workstation**

This frame is best for single-shift, single-operator applications where frequent height changes are not required. Height adjustments are made by removing the locking hand screw, repositioning the telescoping leg to the desired height and replacing the locking hand screw.

**FEATURES:**
- Cantilevered style leg ensures ample leg room
- Designed to support 5th to 95th percentile operators in a sitting or standing posture
- Adjust 28” to 44” without work surface
- Programmable switch provides digital height read-out and preset adjustability
- Electric style has dual-synchronized linear actuators with integral limit switches, 12 VDC low voltage control
- Supports ADA compliance
- White epoxy powder coat finish
- Work surface and accessories ordered separately; not compatible with Industrial and Office accessories.

**FEET AND CASTERS**

**Leveler Feet**
- Allow user to level workstation on uneven surfaces
- Leveler glides included
- Shown above on LMC model

**Heavy Duty Standard Casters**
- Available with locking and non-locking casters
- Phenolic wheel material
- 3” polyurethane casters
- Increases mobility

**Universal Leveling Casters**
- Nylon wheel; rubber leveling pad
- 2 1/2” wheel; 4 1/2” overall height
- Non-marking

See chart for foot and caster ordering information.

**LABORATORY UTILITY TABLES**

**Laboratory Utility Table**

This sturdy, four-post workstation is available with leg extensions or casters. The leg extensions are inserted inside the workstation legs and secured with machine screws.

**FEATURES:**
- Ships knocked down (KD)
- White epoxy powder coat finish
- Work surface and accessories ordered separately; not compatible with Industrial and Office accessories.

**BUILD YOUR PART NUMBER**

| LUE: Utility table with Leveler Glides and Leg Extensions |
| LUC: Utility Table with Swivel Casters |
|-------------------------|-------------------------|
| Load Capacity 1,000 lbs* | Load Capacity 600 lbs* |

**Under Work Surface Shelving**

- Provides additional storage for occasional use items
- Available in half or full depth
- Choice of Phenolic Resin, Epoxy or Laminate surface

**See chart for foot and caster ordering information.**
Laboratory Carts

Laboratory carts are a light duty, economic table providing flexibility and maneuverability in the lab. Carts are manually height adjustable allowing for 8” movement.

FEATURES:
- Adjusts 28” to 36” without work surface
- Ships knocked down (KD)
- White epoxy powder coat finish
- Work surface and accessories ordered separately; not compatible with Industrial and Office accessories.

Cart with Leveler Glides (LCL)
- Includes leveler glides

Cart with Casters (LCC)
- Includes 2 locking and 2 non-locking casters
- 5” polyurethane casters
- Increases mobility

LABORATORY WORK SURFACES

Premium Grade Plastic Laminate

This highly durable work surface is constructed of 1 ¼ high density core board laminated with a layer of high pressure plastic laminate.

Standard Laminate

Our most popular and economic work surface. All four sides are edged with a high-impact-resistant 3mm thick PVC edging in a complementary color. Finished with a 2mm radius.

Stainless Steel

Durable and chemical-resistant, 1 ½” stainless steel work surfaces are constructed of 14 gauge stainless steel formed over laminated core board. Work surface comes with a random brushed finish and is non-reflecting.

Epoxy

A monolithic thermosetting material composed of modified epoxy resin and a fine filler material. This material exhibits exceptional structural strength and excellent chemical resistance. Finished edges are the same material as the work surface. Thickness is 1”.

Phenolic Resin

Solid phenolic is a high-pressure, thermoset resin composite, chemical-resistant material. It is nonporous and non-conductive with high impact resistance and superior structural strength.

For additional work surface options, please refer to the industrial work surfaces pages. Standard Color: Black; additional colors available. See QuickShip page for eligibility.
### Surface-Mount, Steel Slotted Uprights

**Upright Capacity** for 36" & 48" Workstations: 150 lbs.
**Upright Capacity** for 60" & 72" Workstations: 225 lbs.
- Allow convenient access to accessories with optimal ergonomic reach to increasing productivity.
- Slotted pattern allows adjustment in 1" increments without tools.
- Accept laboratory accessories only.
- Include hardware and mounting brackets.
- White epoxy powder coat finish. Additional colors available.

### Premium Grade Laminate Shelf

- **30" Shelf Capacity**: 100 lbs.
- **36" Shelf Capacity**: 120 lbs.
- **48" Shelf Capacity**: 150 lbs.
- Provides additional storage space within operator reach to keep work surface open.
- Includes a structural rear retainer lip.
- Includes two angled brackets with white epoxy powder coat finish. Additional colors available.
- Standard black laminate; additional colors available.

### LED Under Shelf Light

- Provides increased visibility and lighting for detailed tasks such as medical device assembly and testing/research.
- Built-in on/off switch with infinite dimming capability.
- 60w power supply and jumper cords.
- Mounts underneath shelf; screw and magnetic mounting clips included.
- One task light recommended per shelf.

### CPU Holder

- Capacity: 50 lbs.
- Securely holds CPU off of floor and provides easy access when needed.
- Mounts under all laboratory work surfaces at least 30" deep.
- Easy to install, wraparound design.
- Adjusts to fit CPUs 2 1/4" w to 11 3/8" w by 14 1/4" h to 22 3/4" h.
- 16" sliding track with 360 degree swivel.
- Color: Black

Pneumatic Height Adjustable Flat Screen Monitor Arm
CAPACITY: 20 lbs.
- Provides optimum flexibility to move monitor into position
- Has tilt adjustability for improved viewing angle
- Holds monitor in place
- Height adjustability range = 11”
- Extension adjustability range = 22”

**PART NO.**
**DESCRIPTION**
**WEIGHT**
PFSMAS Pneumatic Height Adjustable Flat Screen Monitor Arm 7 lbs.

Under Work Surface Keyboard Tray & Mouse Pad
Keyboard Tray
- Allows operator to access keyboard and mouse as needed then store under work surface when not in use
- Tray size 11 3/4” x 21” includes ergonomic support strip for operator comfort
- 18” track to allow in/out movement with 360-degree swivel
- 15-degree tilt
- 6” height adjustability
- Mounts under all laboratory work surfaces at least 30” deep

Mouse Pad
- 10” diameter
- Includes ergonomic support strip for operator comfort

**PART NO.**
**DESCRIPTION**
**WEIGHT**
UWKTU Tray and Mouse Pad 13 lbs.
UWKT Tray only 11 lbs.

Not compatible with laboratory carts

Pneumatic Height Adjustable Keyboard Tray with Mouse Pad
CAPACITY: 20 lbs.
- Provides optimum flexibility to move keyboard into ergonomic position
- Keyboard platform rotates for easy adjustment
- Holds tray securely in place
- Tray includes 2” padded ergonomic wrist support strip for operator comfort
- Height adjustability range = 11”
- Extension adjustability range = 22”
- Keyboard tray is 10 ½”d x 19”w; Mouse pad is 8 ¾” diameter

**PART NO.**
**DESCRIPTION**
**WEIGHT**
PKBAAS Pneumatic Height Adjustable Keyboard Tray 12 lbs.
